Your Personal Guide for  
 The Art and Science of Managing Well

## There Is An Intellectual Foundation For Modern Management

- A Science of Making Things Better
- A Context for Improvement
- Achieve Growth through Operational Performance

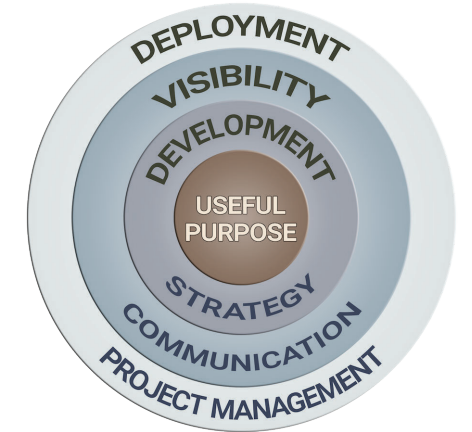

## Trust How Your Business Operates

Don't let your business processes hold you back  
Spend your time building the future

### Cohesive Organization

- Align & Synchronize Leadership - enhance relationships
- Enhance clarity and convey business intent
- Create meaning, Understanding, & Full Engagement
- Put Initiative into the Context of a common goal
- Build Strategic Agility and Capability into the organization
- Be Competitive - better customer satisfaction, more responsive projects, and greater productivity

“Opportunity is missed by most people because it is dressed in overalls and looks like work.”

## The Enemy of Business is Noise

### Effective Managing

Improving work practices is a skill that produces great success. However, efforts directed toward immediate need may not be the wisest course. What is needed for the long term, is to achieve purposeful, executive-directed, transformation of the organization's performance. To work on improving the overall excellence of the company, we should explore the theory and practice of management that spawned the current improvement programs and prepare ourselves for the future.

### Integrating Elements

Strengthen your organization now. Proactively create the appropriate strategy, culture, structure, processes, and values to produce dynamic and meaningful change. Align management principles and structures, synchronize leadership, and encourage management transparency. Your company will experience smoother operations now and the flexibility to meet future challenges.

## Framing Your Project

LEVERAGE CONTEXT  
BEFORE CREATING ACTION PLANS

### Lasting and Enduring Solutions

- Employees focused on the customer's success while you focus on the company's success
- Departments working together, as one unit, so everyone wins
- Manage processes, not personalities
- Feel confident the business is self-sufficient
